

Week	Name	Details(Tasks)
1	Wafaa Sayed Mohamed	<ol style="list-style-type: none"> 1. We chose the project idea, which is a hotel booking 2. We searched for templates for our project idea, then chose the appropriate template for our idea, which consists of 8 pages. Then we modified some of the pages to suit our idea. 3. Then we divided the project among the team members
	Mostafa Mahmoud Nagaty	
	Amaal Mostafa Alassal	
2	Wafaa Sayed Mohamed	She created three pages: home, room details, and checkout, using html, css, and bootstrap
	Mostafa Mahmoud Nagaty	He created two pages, rooms and booking, using only html, css and bootstrap
	Amaal Mostafa Alassal	She created three pages about us, news, and contact using html, css, and bootstrap
3	Wafaa Sayed Mohamed	It created functions for pages, for example, a function calls a function from the API with a specific id and then displays that data within the html page, and a function takes data from a form and stores it in a database and displays it on another page.
	Mostafa Mahmoud Nagaty	He created functions for the pages and the API, for example, Function sends all the rooms, and Function sends the data for a specific ID, through which we can deal with the databases and then display them on the pages that need that.
	Amaal Mostafa Alassal	she created functions for the pages, for example, a function calls a function from the API to fetch rooms to display on the pages, and another function to display details of a specific room.
